NEW CARNATIONS

We will next season disseminate the two new carnations described below. Watch for announcements in the trade journals, and send for special literature giving illustrations and full descriptions, and terms of sale.

“CHIEF KOKOMO”

A novelty of the highest order. Yellow ground with pink stripes. Yellow carnations always attract attention. This variety has unusual keeping qualities. Works up wonderful in basket and spray arrangements. Propagates easy and grows vigorously.

“LIGHT PINK ABUNDANCE”

You know what Pink Abundance is and so it will be easy for you to visualize this variety when we tell you it is a Daybreak colored sport from that moneymaking sort. We predict that Light Pink Abundance will become as famous as its parent.

Delivery on both of these varieties will begin in December of this year.
